why am I talking about this?

- Part of 2017-18 Faculty Learning Community (FLC) "Using Anti-Deficit and Asset-Based Models to Foster Student Success at Miami University."
- Marginalized students (often referred to as "underserved," "underprivileged" or "at-risk") historically approached with a deficit mindset by educators, researchers and administrators.
why should it matter to you?

Miami University Class of 2022 is most diverse cohort ever on the Oxford campus:
- 17.4% domestic students of color
- 16.3% first-generation students
- 8% international students

miamioh.edu/news/top-stories/2018/05/incoming-class-2018.html
why should it matter to you?

Studies show asset-based teaching enhances student achievement, whereas labels and policies orienting students as "problems" promote academic and social segregation, hurt academic progress and effect mental health and personal development.

Gay, 2010: blog.tesol.org/power-of-words-deficit-discourse-and-ells/
"Deficit approaches to teaching and learning, firmly in place prior to and during the 1960s and 1970s, viewed the languages, literacies, and cultural ways of being of many students and communities of color as deficiencies to be overcome in learning the demanded and legitimized dominant language, literacy, and cultural ways of schooling [...] Simply put, the goal of deficit approaches was to eradicate the [...] practices many students of color brought from their homes and communities and to replace them with what were viewed as superior practices" (p. 93).
what exactly is an anti-deficit or asset-based approach?

"[T]he deficit model has traditionally focused on what is wrong rather than what is right[.] An alternative approach looks at the proverbial glass as half full instead of half empty[. A]n asset-based approach is about the target group's strengths and competencies."

Rose, 2006

Harper, 2012
DISCUSS in pairs or small groups Harper's Anti-Deficit Achievement Framework & King's related HuffPost blog post:

What are your initial thoughts?
What implications might this have or ideas does this spark for your research? Instruction? For other aspects of your work (ex: research & reference support, engagement)?
READ: tinyurl.com/beyondddeficit

REFLECT on a time you (consciously or not) approached a situation with a deficit mindset, inside or outside of the classroom.

What were your thoughts at the time? What happened? How might things have been different if your approach to the situation, student, colleague, course, etc, was instead asset-based?
SO, WHAT SHOULD WE DO ABOUT THIS?!
REFLECTIVE TEACHING

"Reflective teaching is defined as a systematic self evaluation cycle conducted by teachers toward their own teaching through an open discussion with colleagues or written analysis. Since it is a cyclical process, the teachers should monitor, reflect, evaluate and revise their own practice continuously in order to meet the high standard of teaching (Jacobs et al., 2011). It is an approach in which the teachers verify their own action and attitudes, then consider the way to improve them as the guidance for future actions (Conley et al., 2010)" (Ratminingsih, Artini, Padmadewi, 2017).

ACQUIRE RACIAL LITERACY & LEARN NEW TEACHING METHODS
https://www.aaup.org/article/eight-actions-reduce-racism-college-classrooms

- Read and discuss race-focused publications (10 Recommended Books at end of article)
- Attend sessions at conferences outside of one's discipline focused on student success & teaching diverse learners (NCORE, AAC&U's Diversity, Equity, and Student Success Conference)
CULTURALLY SUSTAINING PEDAGOGY

Evolution of "culturally relevant pedagogy" (Ladson-Billings, 1995) and "culturally responsive teaching" (Gay, 2000).

CSP "requires that our pedagogies be more than responsive of or relevant to the cultural experiences and practices of young people—it requires that they support young people in sustaining the cultural and linguistic competence of their communities while simultaneously offering access to dominant cultural competence (Paris, 2012).

Must honor and value communities' practices of the past ("heritage practices") and current/evolving practices ("community practices") (Paris & Alim, 2014).

All of this is enough for AN ENTIRE YEAR of coffee hour topics... I won't even try to cover everything today!
"Asset-based approaches are not predicated on identifying assets before the educational encounter. Rather students and teachers are continually identifying and translating assets for use in the academic environment."

Morrison, 2017
Think about an upcoming credit course, library instruction session, online learning object, etc, that you will lead/teach/create in Fall-Spring 2018/19.

How might you begin (or how are you already) employing an anti-deficit, asset-based approach?
As we learned in the instruction retreat, reflection is now encouraged when we report on instruction & our library will move forward with a new reflective peer mentoring program in the fall.

How can you continue these conversations with your peers? How might you consider these topics as you reflect on instruction?
thank you!
